BRIGHT METAL OBJECTS

Dynamic explorer  
of a functional-creative philosophy,  
Giacopini furniture and metal  
accessories brand, create  
with its collections a combination  
of style, aesthetics and design technique.

Unique, modular and totally  
customizable objects  
that respond to the “Bright Metal  
Objects” company payoff,  
which perfectly explains how iconic  
bright and brilliant colors  
can blend harmoniously with raw  
components like metal and iron.

An alchemical fusion of complementary  
attitudes, which in Giacopini are molded  
into original objects that reinterpret  
this traditional material in a hyper  
contemporary key. A balance  
between strength and lightness.

Iron specialist and designer of solutions  
and furnishing accessories, the founder  
of the brand Michele Giacopini creates  
collections that, thanks to his technical  
skills and experience gained  
over the years, can also be modified  
by customers, to meet the decorative  
and design requirements  
of all domestic and public interiors.

Michele — Giacopini

I produce increasingly  
flexible, infinitely adaptable  
multifunctional items  
that are able to design public  
and domestic spaces  
in a balance between  
strength and lightness.

Dinamico esploratore di una filosofia funzionale-creativa, il brand di arredi e complementi in metallo Giacopini crea con le sue collezioni un connubio tra design, estetica e tecnica progettuale.

Degli oggetti unici, modulari e totalmente customizzabili che rispondono al payoff aziendale “Bright Metal Objects”, che spiega perfettamente come degli iconici colori accesi e brillanti possano fondersi armoniosamente con componenti grezzi come il metallo e il ferro.

Un'alchemica fusione di attitudini complementari, che in Giacopini si plasmano in oggetti originali che reinterpretano questo materiale tradizionale in chiave ipercontemporanea. Un saldo equilibrio tra forza e leggerezza.

Progettista del ferro e designer di soluzioni e complementi d'arredo, il fondatore del brand Michele Giacopini realizza delle collezioni che, grazie alla tecnica e all'esperienza conseguita negli anni, possono essere anche modificate dai clienti, per rispondere alle esigenze decorative e progettuali di tutti gli interni domestici e contract.

# 2006

In the 2006 the Giacobini siblings  
- Sara, Marta and Michele -  
give life to the company,  
specializing in iron processing  
with a preference  
for the interior design sector.

# 2009

The first projects take shape.  
The “conscious construction”  
philosophy is growing, the company  
begins to create objects  
with a long life cycle  
and that can easily be repaired,  
using recyclable materials  
that can be separated  
at the end of their life.

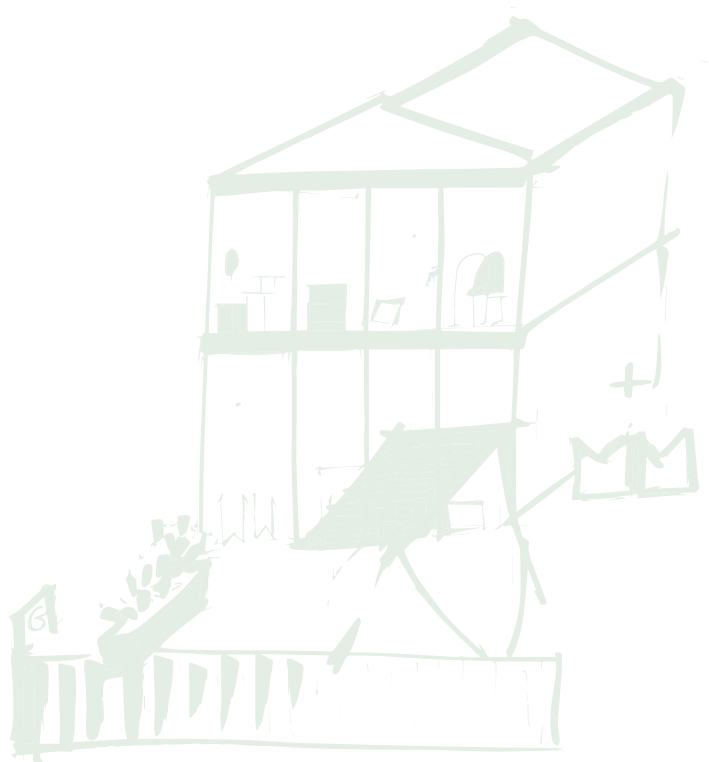

# 2011

The new website is online.

# 2014

The company moves to its new headquarter, a space that is consistent with its philosophy where it is possible to develop new projects.

# 2018

With the creative direction of MM Company, Michele Giacopini combines technique, design and production to create Giacopini, design brand "Made in Verona".

The soft pop creations of the iron designer have as their main focus the modularity of their products, from which objects that are multifunctional and endlessly modular, with a contemporary taste are born.

Design — Michele Giacopini  
& MM Company design studio

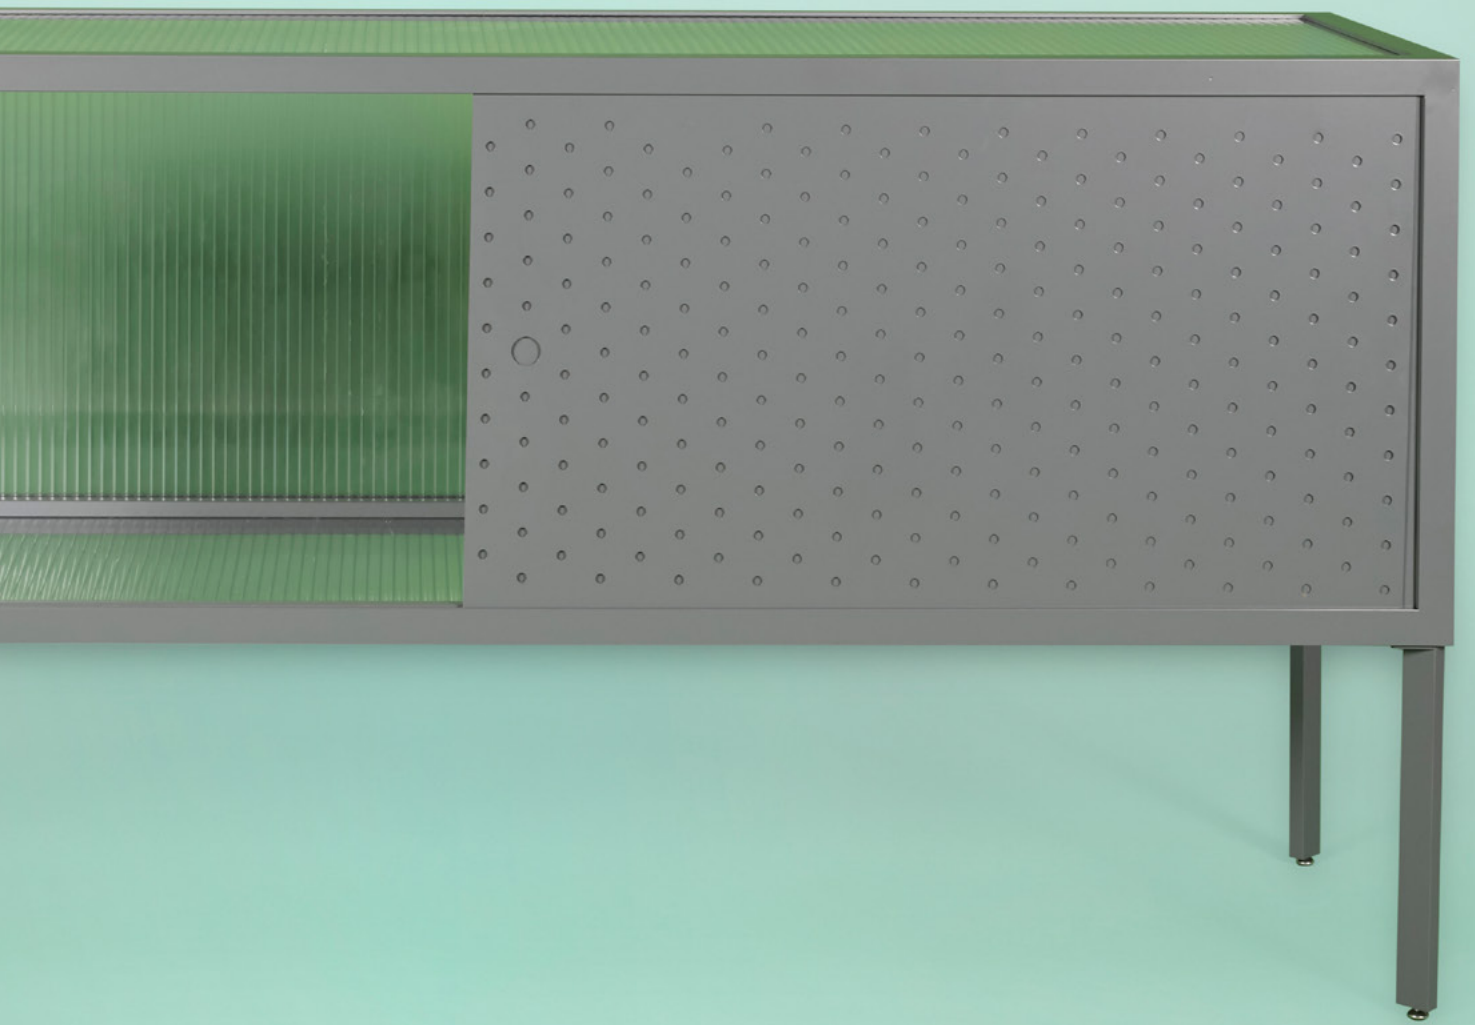

# Maia

Maia is a sideboard  
with an essential design, perfect  
for contemporary interiors.  
The structure, with a rationalist  
aesthetic, is made of metal,  
covered in transparent  
or smoked polycarbonate.

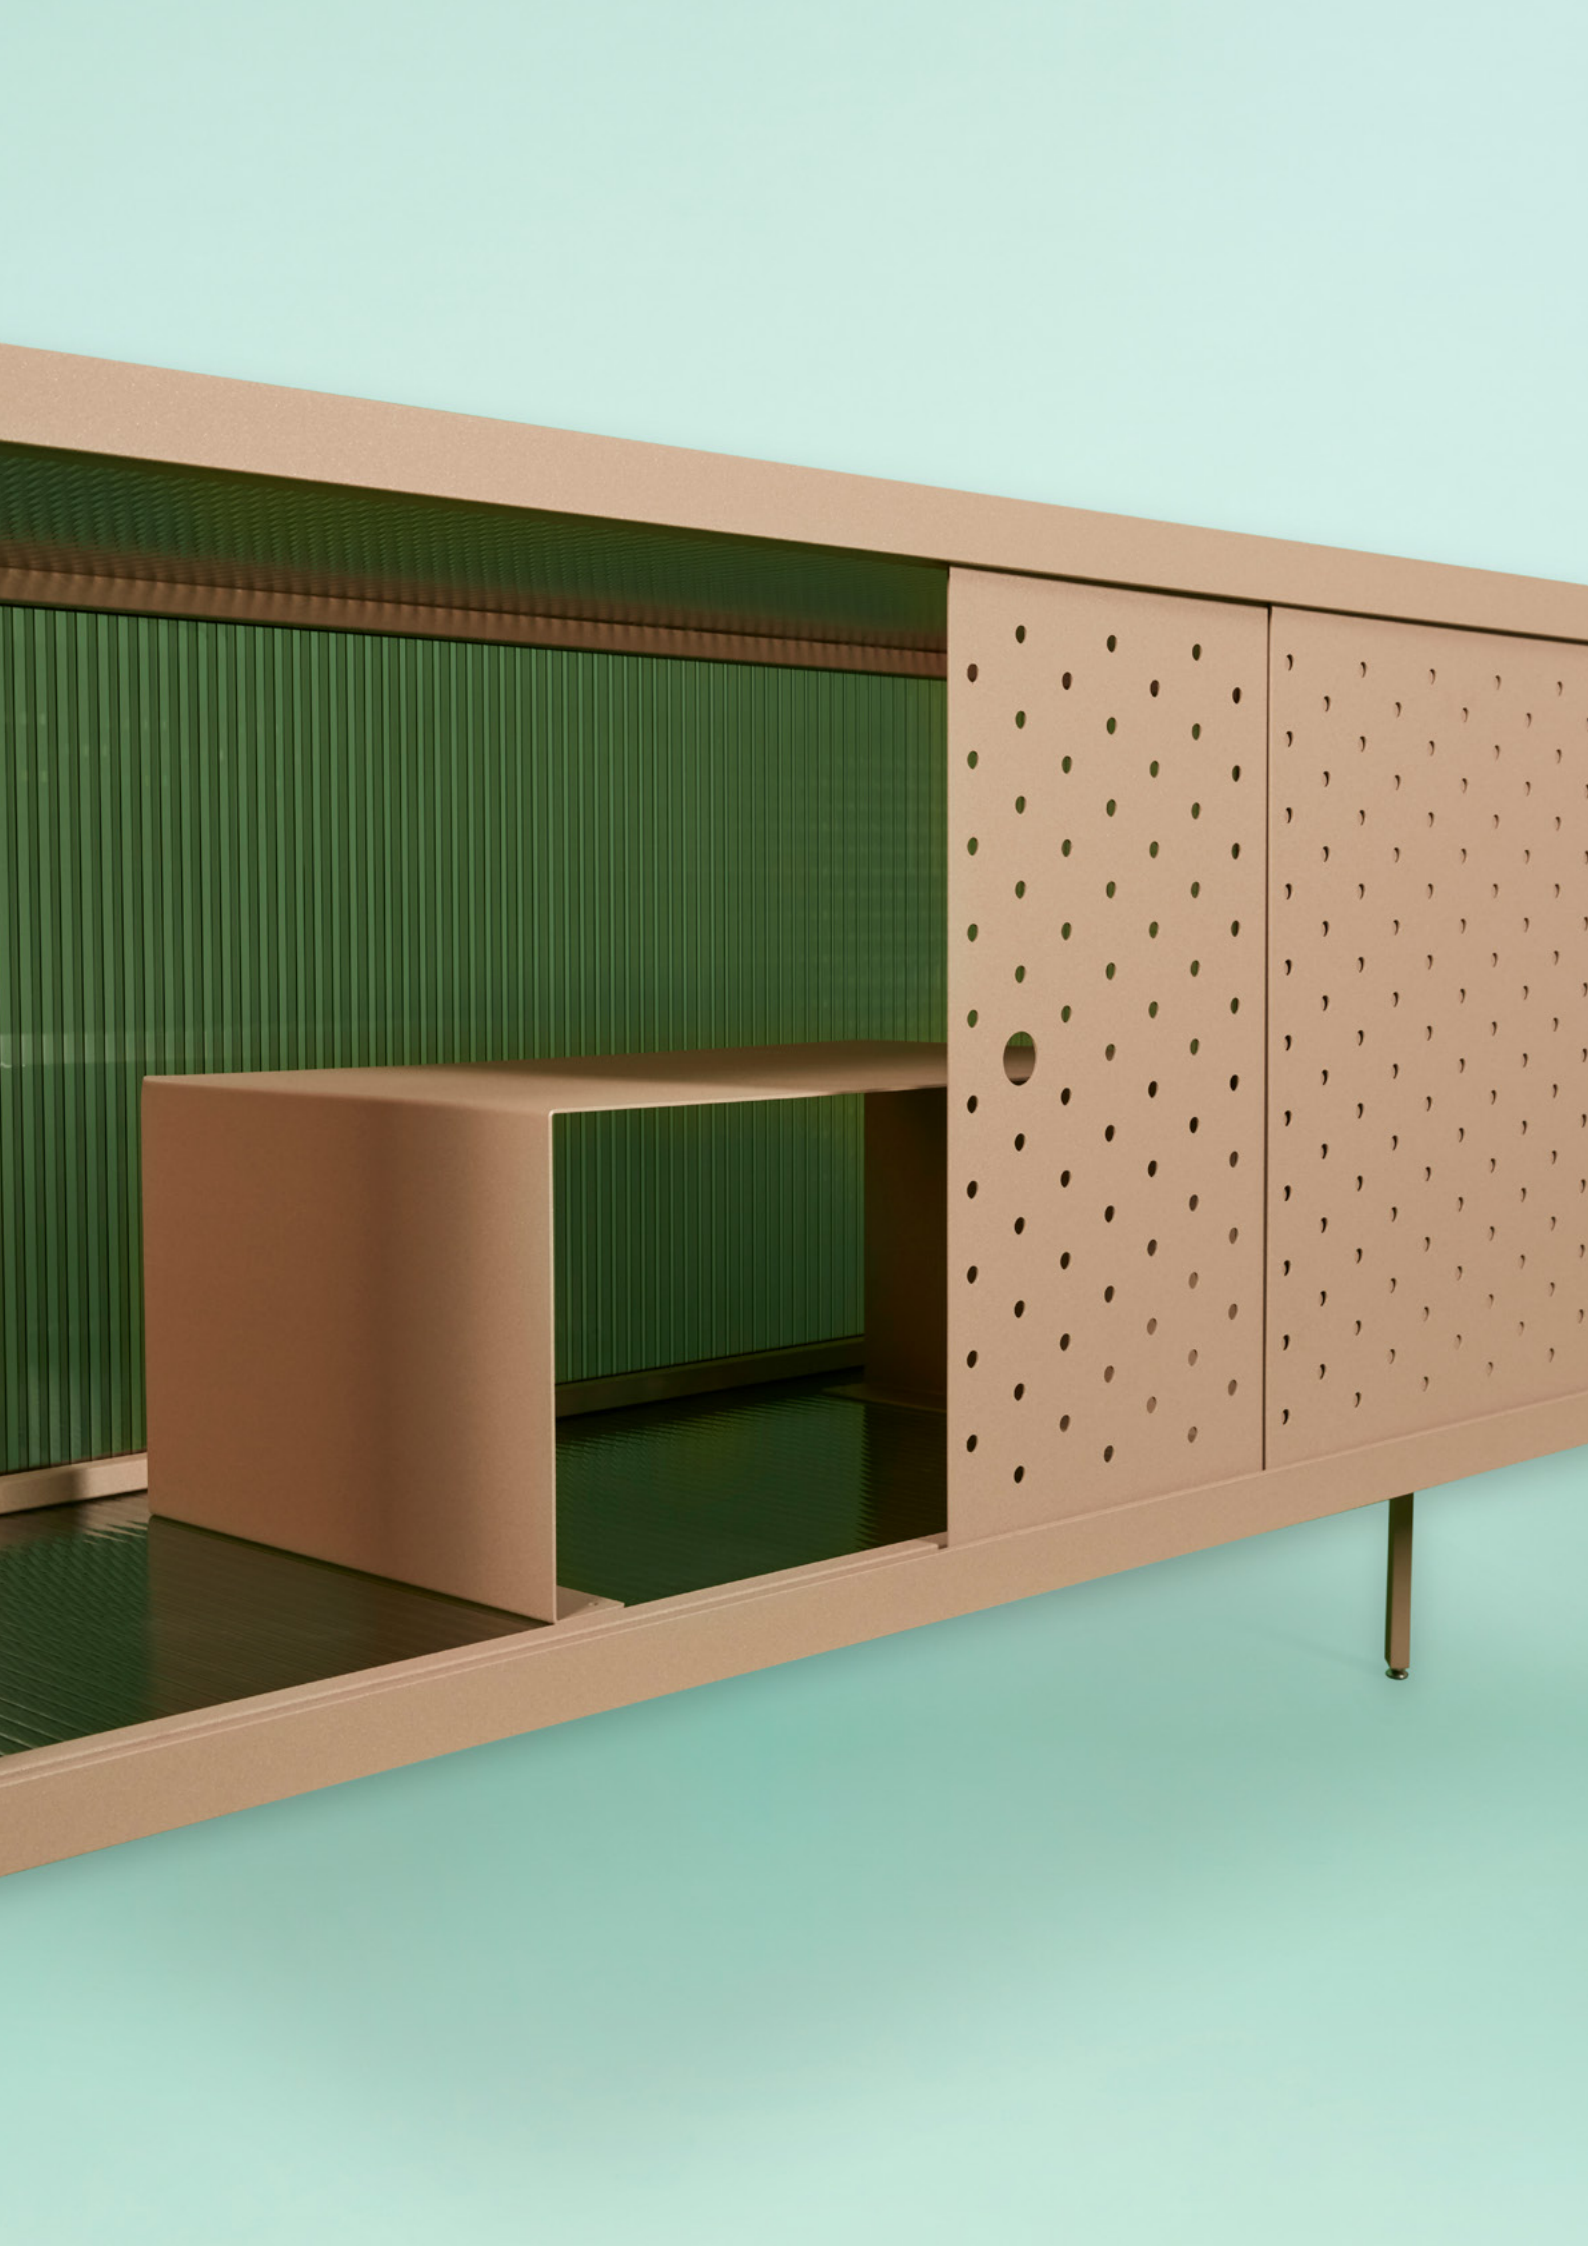

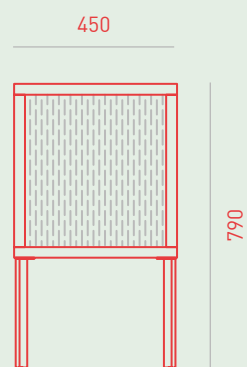

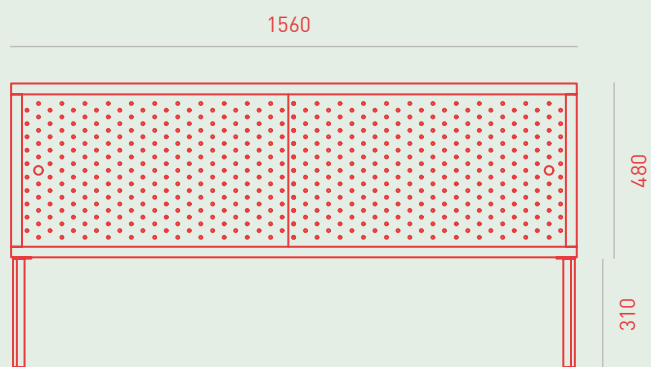

## — Details

Materials:  
metal structure powder coated, polycarbonate.

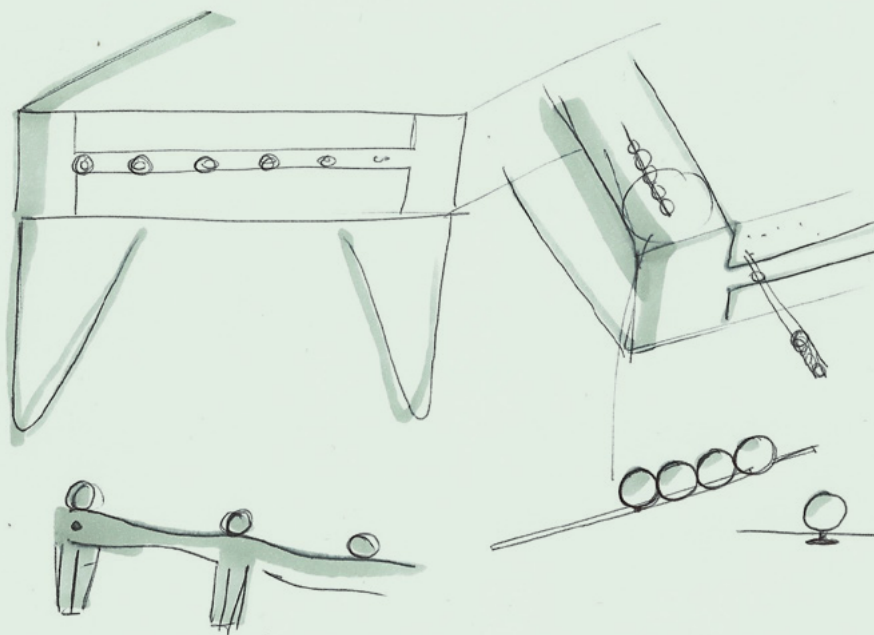

# Joie

# Joie

Joie is an elegant table football,  
for design-lovers only!  
Completely made of metal,  
with care for the smallest details  
and cared for down  
to the smallest detail  
such as the cork grips and ball.  
Joie is enclosed in a shell made  
of perforated sheet metal,  
a hallmark of Giacopini products.

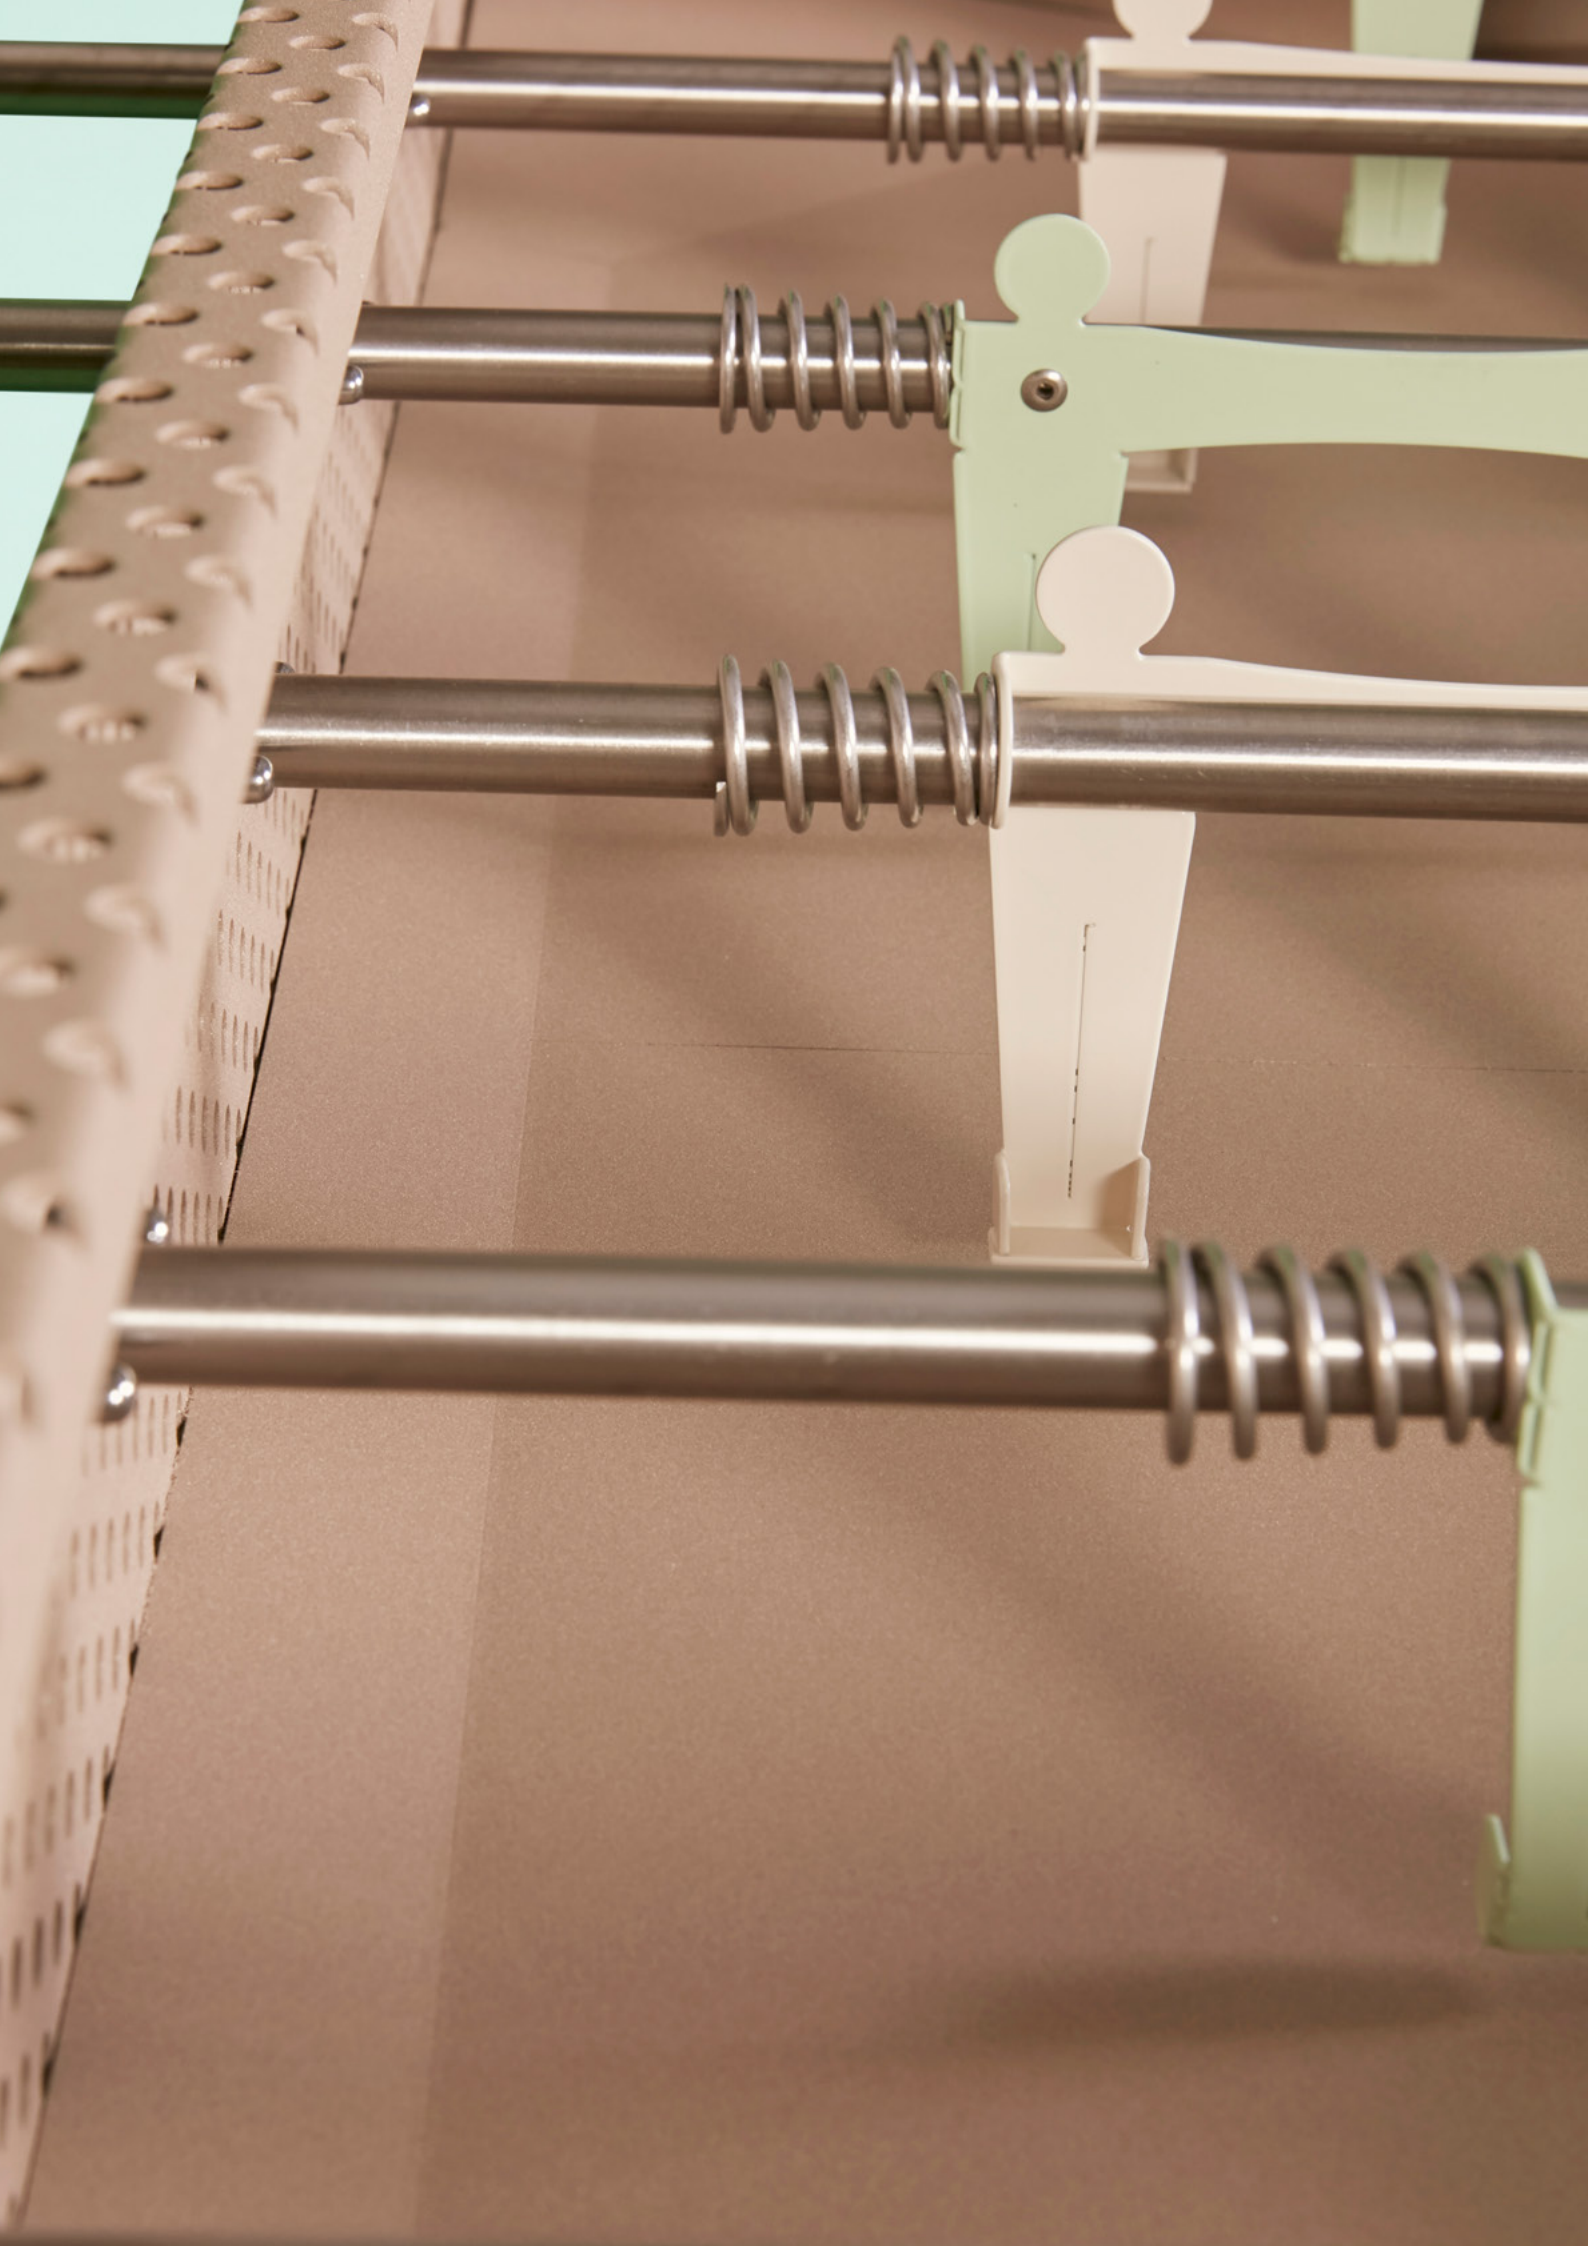

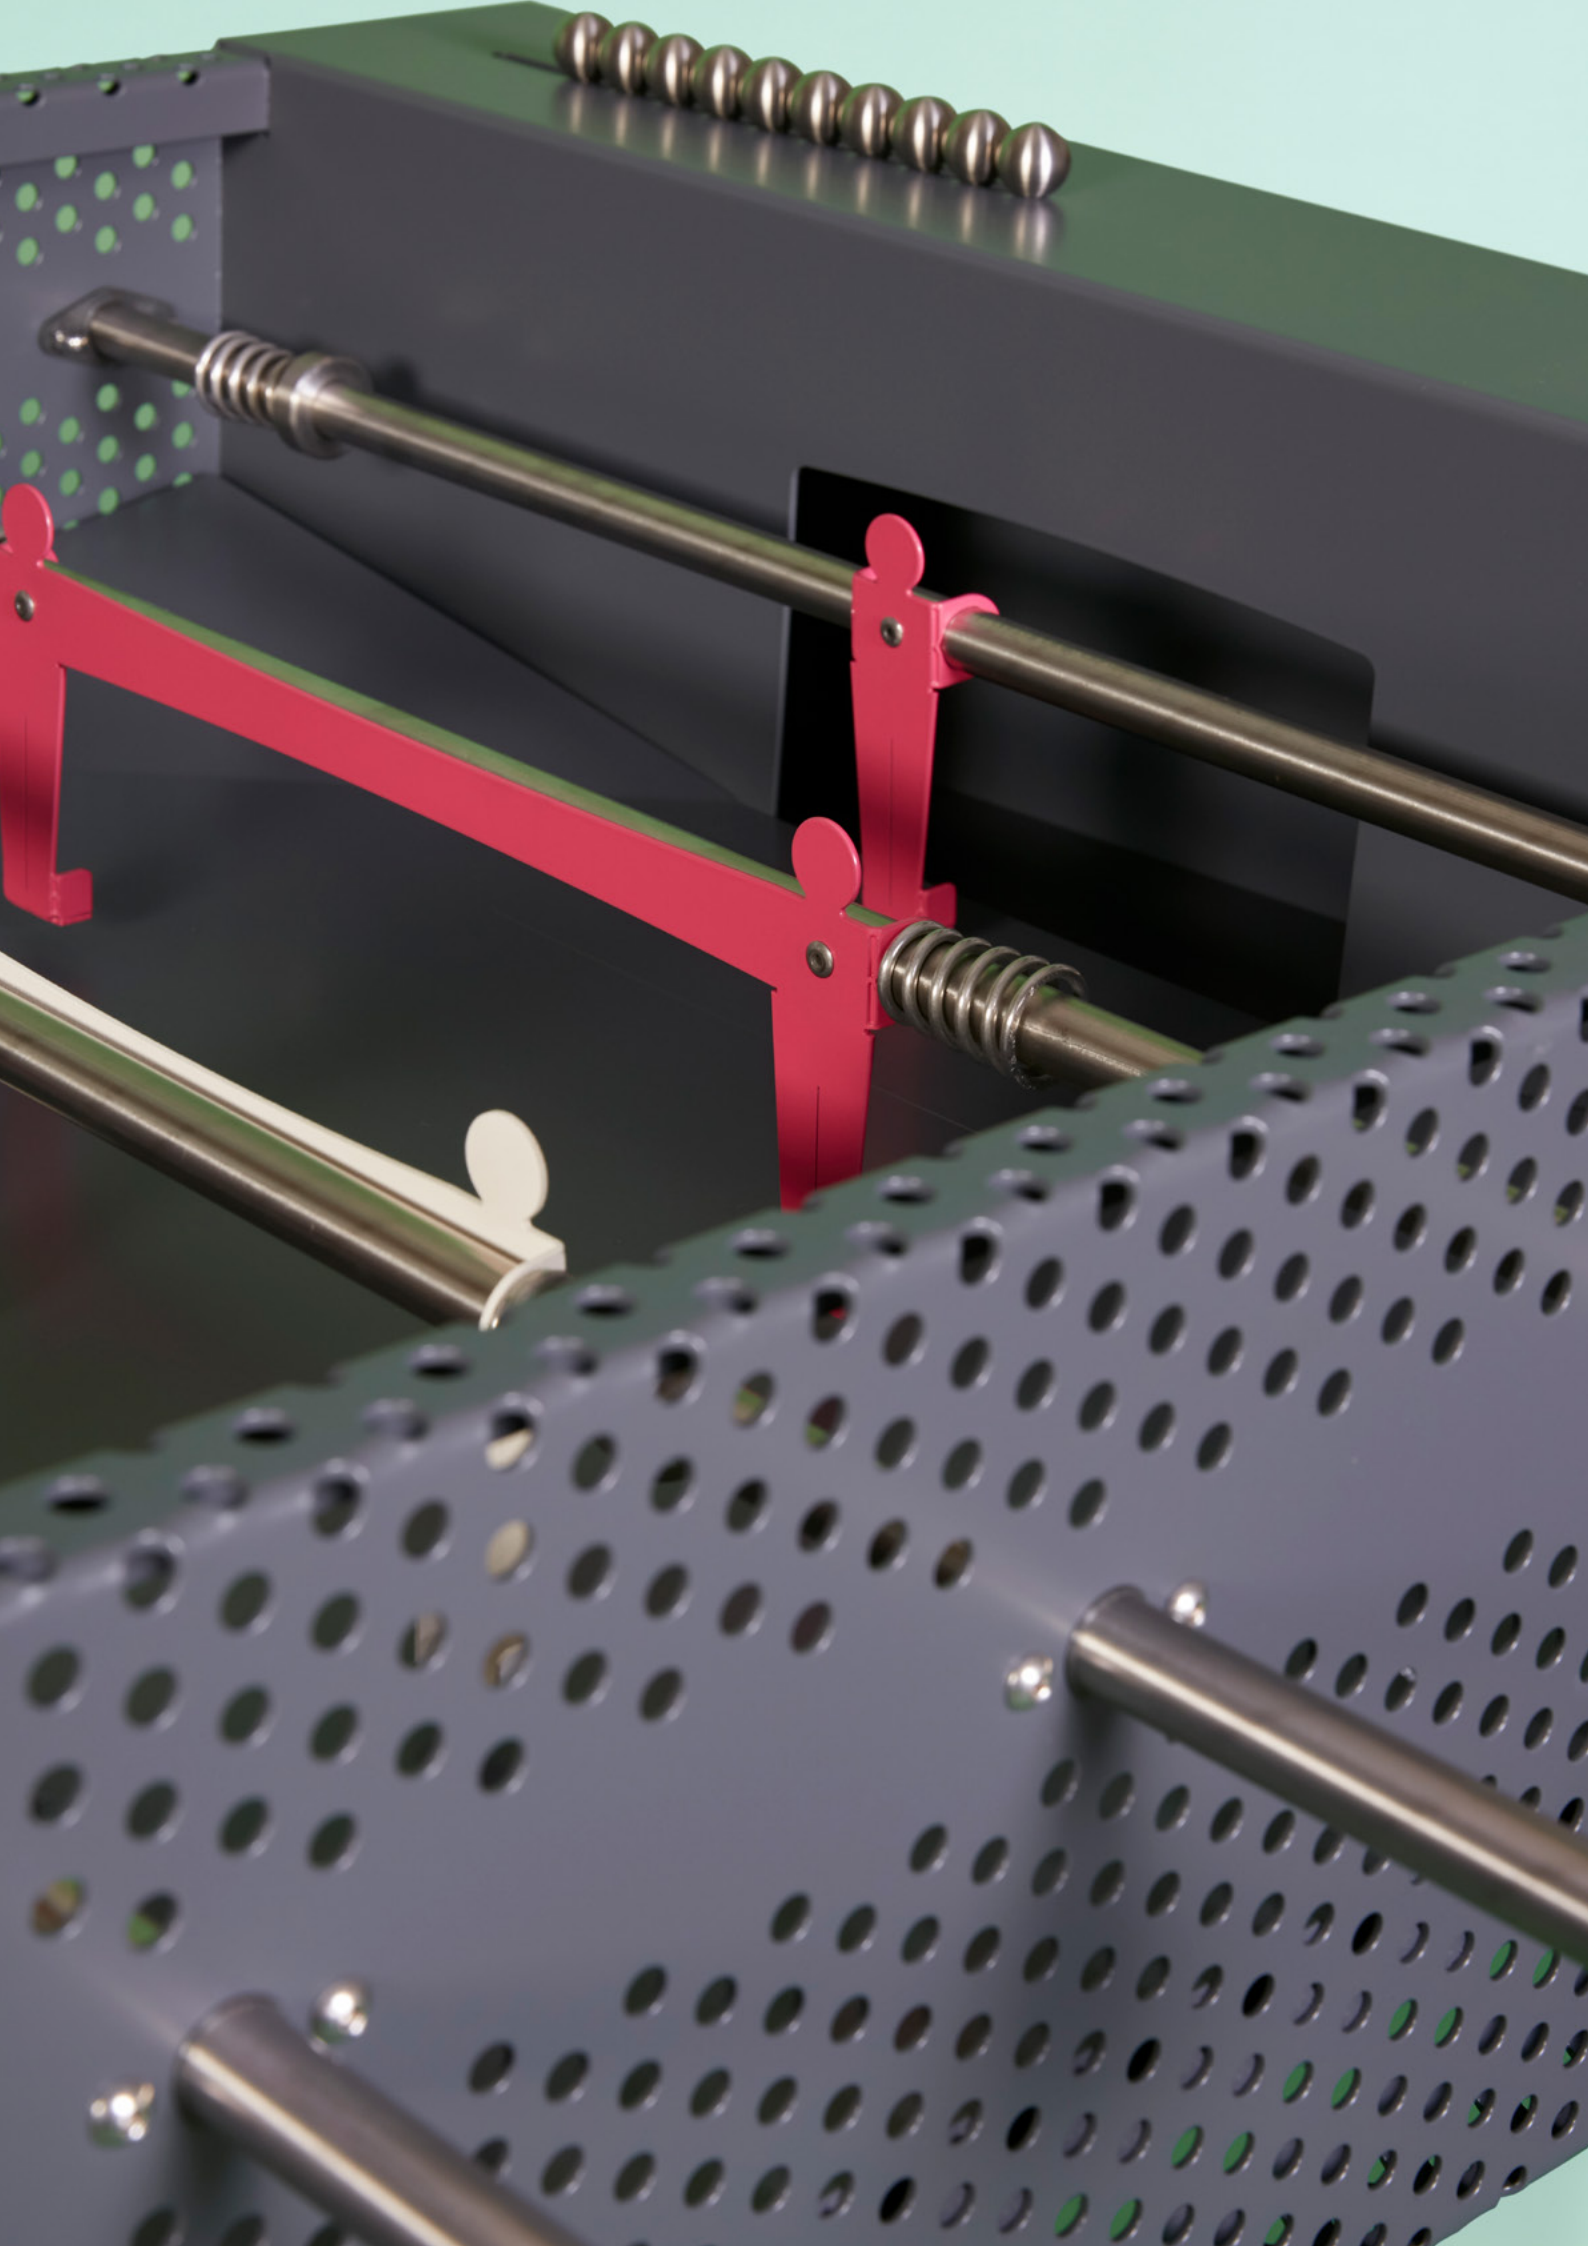

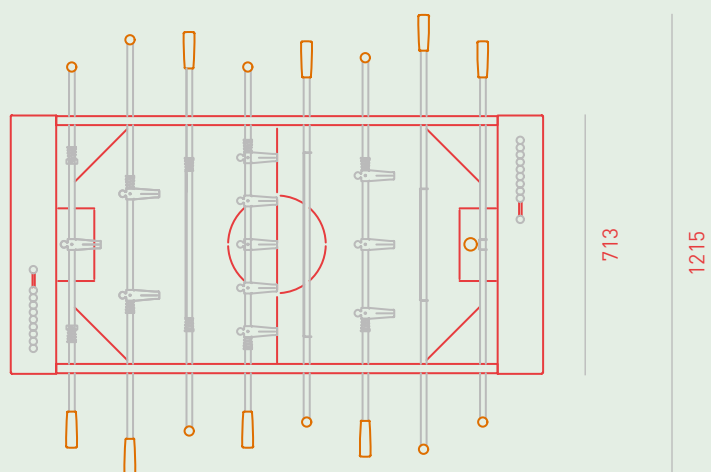

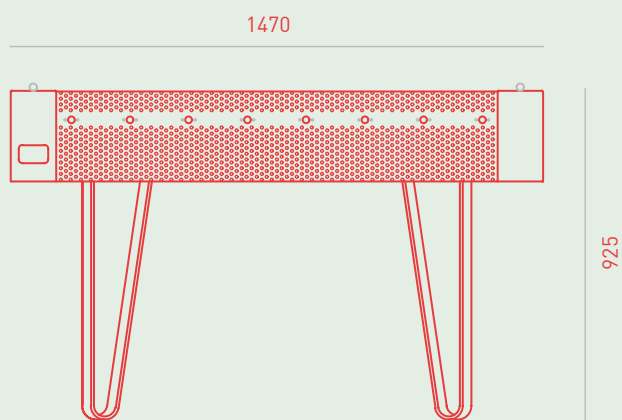

## Details

Materials:  
metal powder coated, stainless steel, cork grips and ball.

# Flip

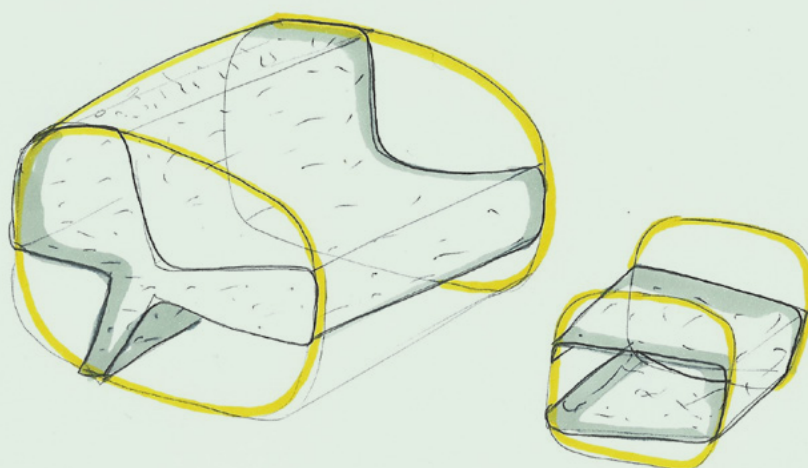

# Flip

Flip is a versatile and multi-purpose metal furnishing accessory:

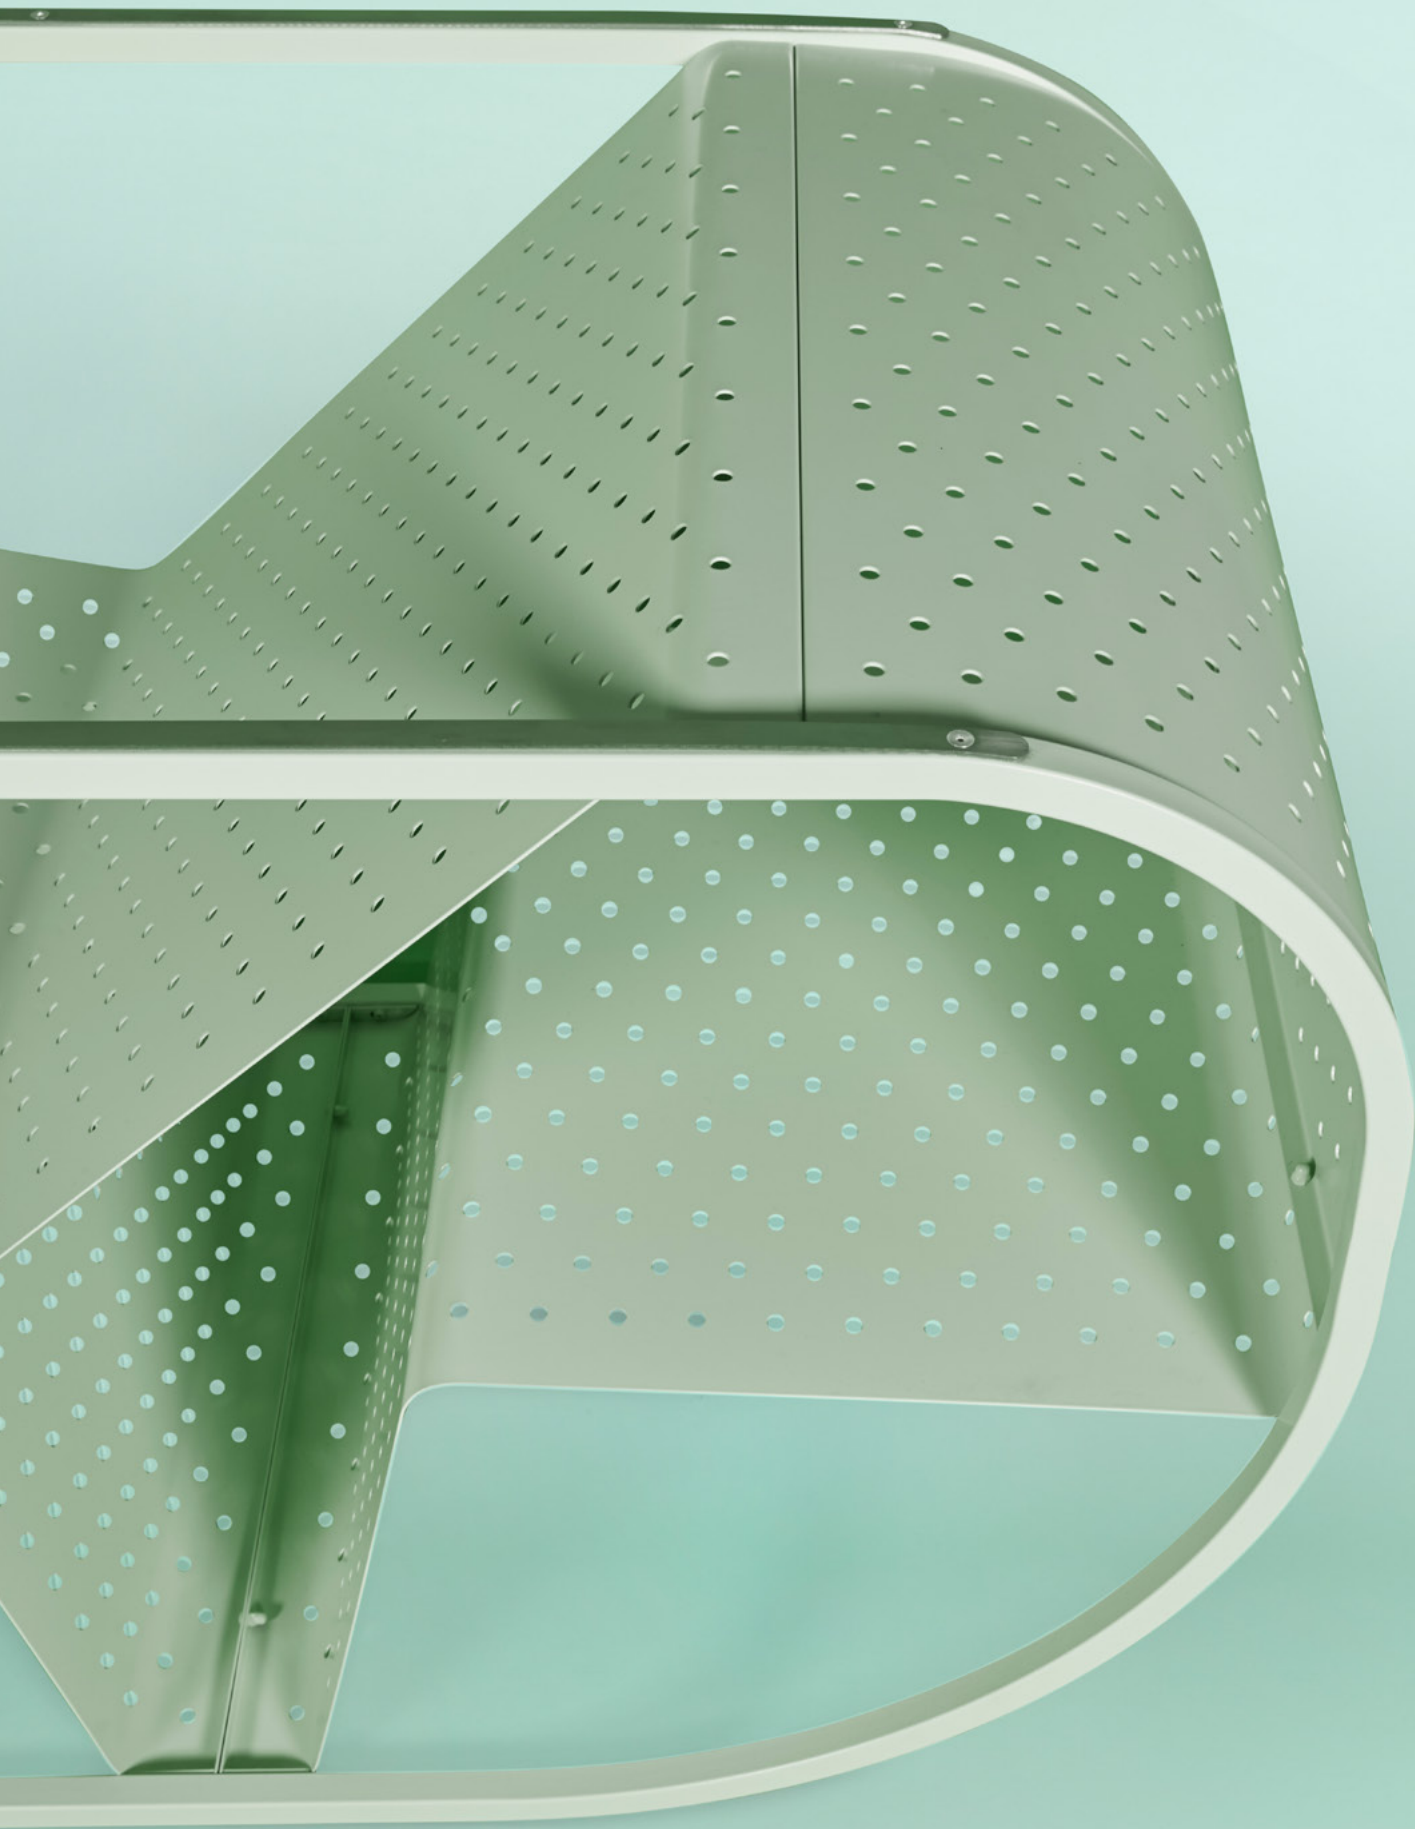

a seat with two workstations  
and a coordinated table that,  
when turned, transform Flip  
into a chaise longue with footrest.

Flip is designed for outdoor comfort able to  
adapt to the different needs  
of people. Made of metal  
and perforated sheet metal,  
it incorporates the distinctive elements  
of Giacopini products.

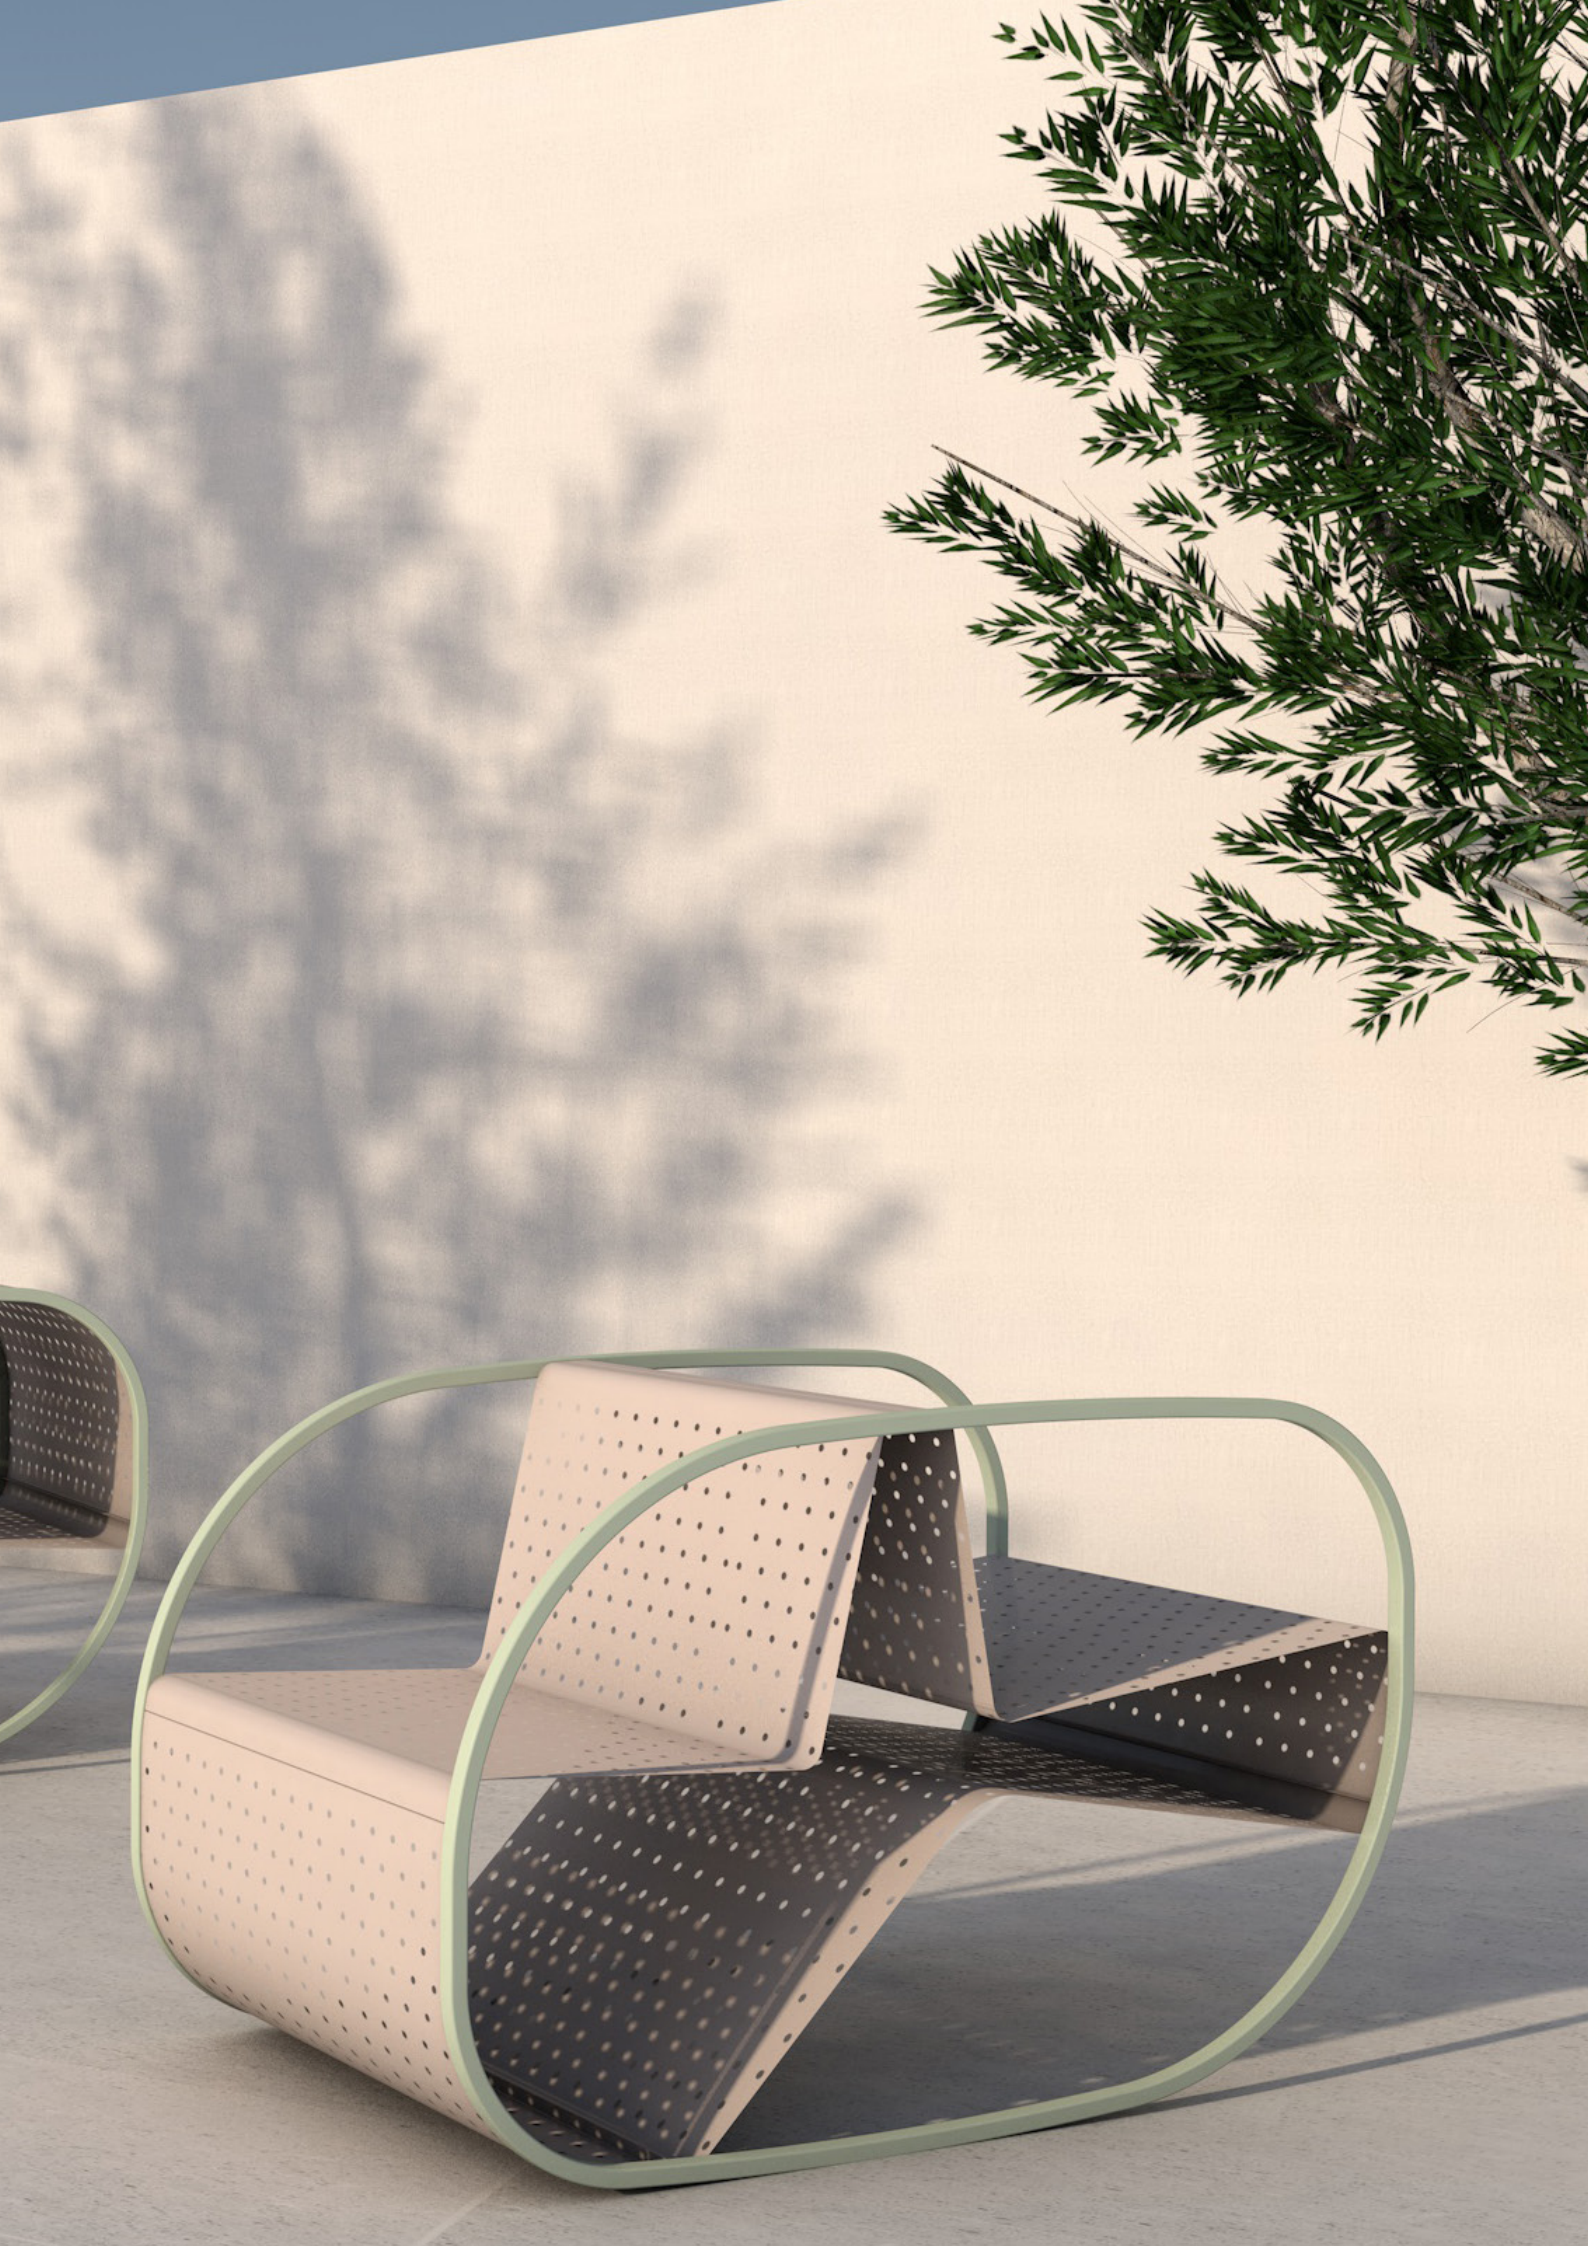

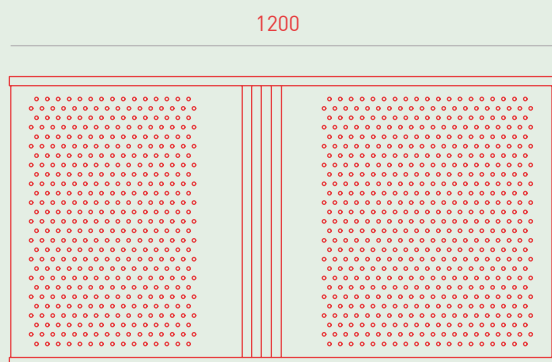

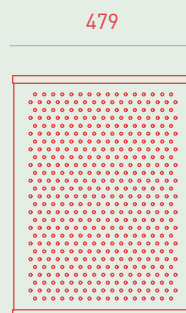

# Details

Materials:  
metal and perforated sheet metal.
